

**1. 2692-36-1** 19.9

The ability to select a set of surroundings suitable for foraging, shelter from predators, and the availability of mates is one of the most important determinants of biological success — measured as survival to reproductive age and the production of offspring.

2. 2692-24-3 19.5

Classes in media literacy traditionally cover how to evaluate the credibility of sources — now they also include recognizing clickbait, understanding the role of algorithms in what content is served up, and observing one's own patterns of distraction.

3. 2692-4142-8 18.9

It involves cultivating a healthy skepticism towards the seemingly objective outputs of algorithms and remembering that these systems are designed by humans with specific goals, and that their data is a reflection of past realities, not necessarily a prescription for future flourishing.

4. 2692-4142-4 18.3

While nudges can be used for beneficial purposes, such as encouraging healthier habits, they also carry the potential for manipulation, particularly when the underlying objectives of the architects are not aligned with the well-being or autonomy of the individual.

5. 2692-40-3 17.6

In one paid study of one hundred college students, subjects who wrote down a list of past good deeds and were then asked to donate money to a charity gave, on average, over half the earnings they'd made from the study — almost twice as much as those who had been instructed to recall previous bad deeds.

6. 2692-37-5 16.2

By contrast, the cultural assumptions of interdependence and harmony require that collectivists limit themselves to implicit and even ambiguous use of words, using terms like maybe, perhaps, or probably.

7. 2692-33-5 16.0

Psychotherapist Fran Weller describes grief work is "an act of devotion, rooted in love and compassion" that requires "an ongoing practice of deepening, attending and listening."

8. 2692-29-3 15.7

Workers' wages can be frozen, even rolled back, but in the end inequality leads to crises of the kind we've recently seen bring about populist protests in the United States and the United Kingdom.

9. 2692-31-2 15.5

As people find themselves regularly on the move, we are experiencing a phase shift like when matter transitions from solid to liquid to gas: molecules heat up and loosen from one another, vibrating more rapidly.

10. 2692-30-1 15.1

Some people are more likely to cheat and steal after purchasing "eco-friendly" products, probably because they feel licensed to do so since they morally account the "eco-friendly" choice as a good deed.

11. 2692-34-7 15.1

But the short-term, obvious implications of greater convenience made it easy to overlook the long-term implications of no longer having one person fix food for the family to eat together at an evening meal.

12. 2692-4142-7 15.1

It means actively seeking out diverse perspectives, challenging algorithmic recommendations, and making deliberate choices that go against the predicted grain.

13. 2692-22-1 14.8

When we are "always on" we are constantly ingesting content — reading alerts and texts, liking, checking emails, downloading, uploading, upgrading, updating, deleting, submitting responses, and posting.

14. 2692-38-7 14.5

Conversely, creating positive social spaces such as parks and pedestrian areas in high-density urban environments may help to lift the general mood and defuse tension.

15. 2692-21-8 ^{13.5}

In flexible-time cultures, it seems clear that the most productive meetings grow in unpredictable ways, and the effective manager is flexible and professional enough to capitalize on priorities and changing needs as they arise.

16. 2692-24-2 ^{13.4}

This means helping students recognize, for example, how the architecture of a social media feed or a news site is deliberately designed to distract or provoke them.

17. 2692-38-6 ^{13.4}

Put into a community setting, crowding may accentuate the dominant behavior — an aggressive group may turn violent as density rises.

18. 2692-37-3 ^{13.3}

They develop a culture-specific communication style that is, for example, direct and explicit in individualistic cultures or indirect and implicit in collectivistic cultures.

19. 2692-37-2 ^{13.2}

At different language acquisition stages, children do not learn language per se; rather they learn the various patterns and styles of language interaction that enable them to function as competent communicators in different situational contexts.

20. 2692-30-7 13.0

For instance, people are more likely to sign a petition addressing environmental damage after viewing evidence of human-caused environmental damage.

21. 2692-38-3 13.0

However, some psychologists see crowding as neutral rather than invariably negative, and believe that people's moods and behaviors intensify as density increases.

22. 2692-40-5 13.0

In other words, people who seemed concerned about appearances (e.g., the impact of their good deed, as much as the deed itself) were less generous than those who cared more about doing good for its own sake.

23. 2692-30-5 12.7

In their search for such a balance, people are inclined to believe in "quick-fixes," because they want to re-establish the moral balance and escape the guilt as quickly and easily as possible.

24. 2692-37-9 12.7

Different words are used to refer to the self, depending on the social situation, the speaker's gender, age, and the other social attributes relative to the listener.

25. 2692-38-2 12.7

Usually, high density is needed for the phenomenon of crowding, which makes people experience sensory overload, a lack of control, and rising stress and anxiety.

26. 2692-4142-3 ^{12.6}

By curating what we see, what we are recommended, and what options are presented to us, they subtly, and sometimes not so subtly, nudge us towards particular paths.

27. 2692-40-4 ^{12.5}

In addition, subjects who'd taken pains to describe not only how they'd been nice to others but how people responded were likely to donate significantly less than those who focused purely on the actions themselves.

28. 2692-30-6 ^{12.3}

In the same way that people may change their attitudes to reduce inconsistencies between attitudes and behavior, people may also change their evaluation of past environmentally burdening behaviors and future environmentally friendly behaviors.

29. 2692-31-6 ^{12.3}

Highly paid digital nomads and billionaires with multiple passports as well as migratory workers are all part of the diverse and growing global demographic of quantum people.

30. 2692-39-5 ^{12.1}

The likelihood that individuals who try to adapt to positive social behaviors will experience organizational exclusion decreases.

31. 2692-4142-1 11.9

The concept of "choice architecture," popularized in behavioral economics, highlights how the design of the environment in which choices are made can significantly influence the decisions people make.

32. 2692-35-6 11.8

For instance, digital twins of physical assets such as power-generation turbines, jet engines, and train engines are becoming common when the assets are very valuable and when downtime would be very costly.

33. 2692-36-2 11.8

Many studies have shown that not only do animals have a remarkable ability to seek out the best available locations for the necessities of life, but that they are able to anticipate how a setting will serve their future needs.

34. 2692-23-8 11.7

This, in turn, creates new and other types of tensions, where the rhythm is unambiguous and predictable, but where unexpected chords and modulations create drama and an experience of development in the piece.

35. 2692-36-3 11.5

For example, the black-throated green warbler, a small songbird that nests in spruce forests of eastern North America, establishes territories preferentially among the red spruce trees early in the summer months, even though these trees offer less food than the neighboring white spruce trees.

36. 2692-23-7 11.4

Therefore, the fluid movement in the prelude usually creates a tension that can be released in the subsequent movement with a set rhythm.

37. 2692-32-7 11.1

In fact, living in those hotels is problematic because the student residents are not a part of a stable group with people who will be their neighbors for the year; they must wait in uncertainty before finding their social niche.

38. 2692-33-3 10.9

At a psychological level, it supports us to both face into our own and others' vulnerability, transience and mortality, and to repair life energy after significant loss.

39. 2692-26-6 10.8

During the Civil War, Olmsted served as General Secretary of the United States Sanitary Commission.

40. 2692-24-7 10.7

By treating these as deliberate design choices (often rooted in psychology and profit motives), young people become more critical users rather than passive consumers.

41. 2692-22-3 10.5

As our will attempts to digest the virtual content its forces are diverted from the physical content, our food.

42. 2692-30-2 10.5

Moral licensing has also been observed in the context of cooperation for the good of the environment.

43. 2692-32-3 10.4

For example, if in a given year more people accept offers of admission than a college expects, quite a few students end up living in dorm lounges or campus hotels.

44. 2692-33-4 10.4

Grief work honours the loss, the sadness and the experience of diminishment or absence, while also setting up the ground for self-transformation and the continuation of life.

45. 2692-26-3 10.2

At age 14, he was preparing himself to study at Yale College, but he could not enter due to a severe sumac poisoning that damaged his eyesight.

46. 2692-30-3 10.2

When people are reminded of deeds they have done that they know were harmful to the environment, they might be left with a feeling of "eco-guilt."

47. 2692-21-5 10.1

What seemed like a priority last week when the agenda was crafted is not necessarily the priority right now — so discussion may branch off in a new direction.

48. 2692-29-1 10.0

Capitalism is not a system where cash is everywhere but rather one in which islands of cash exchange exist within oceans of cheap — or potentially cheap — natures.

49. 2692-29-7 9.8

Frontiers are so important in these processes because they offer places where the new cheap things can be seized — and the cheap work of humans and other natures can be forcefully taken.

50. 2692-32-1 9.7

Of the cognitive motivations, the most fundamental one encourages people to understand their environment to predict what is going to happen in case of uncertainties.

51. 2692-4345-13 9.5

Curious about the man's question, and wondering why he had asked for a text instead of a call, Ridge pulled out his phone and entered the number.

52. 2692-33-1 9.4

Psychological theories across the field agree on the importance of grieving our losses, from the highly personal through to the broadly collective.

53. 2692-34-6 9.4

Now, it was possible to prepare foods very quickly, and this shortening of preparation time was liberating for the cooks in the family, most of whom tended to be women.

54. 2692-35-1 9.3

Digital twins are digital replicas of assets or activities using modeling and sensors to create digital representations.

55. 2692-39-9 9.2

Precautions need to be taken regarding organizational exclusion, which is very important for business.

56. 2692-38-1 9.1

Environmental psychologists make a distinction between the physical measurement of density (how many people are in a particular space) and crowding (the psychological feeling of not having enough space).

57. 2692-30-4 9.0

People who experience eco-guilt seek pro-environmental actions to compensate for this guilt and restore balance.

58. 2692-35-2 9.0

Digital twins are not new; engineering teams in various industries have used 3D renderings of computer-aided design models, asset models, and process simulations for years.

59. 2692-21-9 8.9

Interruptions, agenda changes, and frequent shifts in direction are seen as natural and necessary.

60. 2692-36-5 8.9

Somehow, the warbler has been guided to settle in locations that will suit its future parenting needs better than its present ones.

61. 2692-39-3 8.8

Individuals react to organizational exclusion by trying to strengthen their basic needs, which are threatened.

62. 2692-24-4 8.6

A student might be tasked with tracking how many times they switch tasks or check their phone in an hour of homework, to raise self-awareness about fragmentation.

63. 2692-31-3 8.6

One might even say that humans are becoming like particles in quantum physics, their velocity and location always in flux.

64. 2692-34-1 8.5

When we focus on the obvious aspects of media, we miss the changes that accumulate over time but are not apparent day to day.

65. 2692-31-5 8.4

Instead, the complexity of today's world makes it increasingly difficult to settle permanently anywhere.

66. 2692-35-3 8.4

However, faster wireless networks and the resulting availability of real-time data enable much more detailed and dynamic digital representations.

67. 2692-37-4 8.4

Examples of words linked with the direct style are categorical words like absolutely, certainly, or positively.

68. 2692-36-4 8.3

Later, though, when nests are built and hungry baby birds need nourishment, it is the red spruce forest that offers the easier pickings.

69. 2692-25-1 8.2

The graph above shows the willingness to pay for access to sports content across five different age groups, ranging from 16-24 to 55-64.

70. 2692-39-7 8.2

When excluded individuals grow away from communication and social activities, their contribution to the organization they are in may decrease.

71. 2692-35-4 8.1

When sensors collect data from a connected device, the sensor data can be used to continuously update the digital twin.

72. 2692-20-3 ^{7.8}

The most valuable feedback is likely to come from other sources: you should choose readers for their critical insight, not their closeness to you.

73. 2692-21-7 ^{7.8}

Or sub-groups may form within the room to discuss timely subjects linked in some way to the main meeting trunk.

74. 2692-39-2 ^{7.7}

Therefore, it is possible that precautions regarding organizational exclusion are not taken.

75. 2692-32-9 ^{7.6}

People lack a shared social understanding, normally developed from membership in a stable group.

76. 2692-33-7 ^{7.4}

In time this may build a desire to make good from the loss by repairing as many damages as we can and/or compensating for them.

77. 2692-40-2 ^{7.4}

Simply perceiving ourselves as people who do good deeds and behaving accordingly motivates us to do greater good in the future.

78. 2692-29-2 7.3

Reproducing life within the cash nexus is expensive, and it grows more expensive over time.

79. 2692-39-8 7.3

When this situation is not avoided, exclusion increases even more and strongly affects the performance of the employee in a negative way.

80. 2692-23-3 7.2

There needs to be a process that creates tension and drives the movement towards something in particular.

81. 2692-24-1 7.1

Progressive educators and librarians are developing curricula to teach what we might call attention literacy.

82. 2692-18-2 7.0

As we wish to update the overall design of our brochure, we are considering working with a new printing company.

83. 2692-18-3 7.0

While reviewing several options, we felt that your design style and printing formats seemed to suit our needs well.

84. 2692-22-7 6.8

The result can be a misunderstood text with the need for further clarifying texts and the beginnings of nervous indigestion.

85. 2692-33-2 6.8

Grief is a dynamic emotional process essential to consciousness.

86. 2692-34-2 6.8

Most of us notice the obvious aspects of a new medium or technology while missing the more subtle aspects.

87. 2692-4345-3 6.8

Although the songs the man played were all new to Ridge, he somehow managed to attach his own made-up lyrics to them.

88. 2692-23-4 6.7

The excitement that arises in this process creates satisfaction and pleasure.

89. 2692-25-4 6.7

The 45-54 age group has the same percentage of respondents who are Very unwilling to pay and Unwilling to pay.

90. 2692-26-8 6.7

In 1979, the National Park Service designated his home and office in Brookline, Massachusetts, as a National Historic Site to honor his legacy.

91. 2692-4142-6 ^{6.7}

It requires a conscious effort to maintain critical engagement with the technologies we use.

92. 2692-20-5 ^{6.6}

If you are part of a writers' circle or class, you'll know whose writing you admire, and if you've had feedback in the past you'll know whose opinions have been helpful — and whose have not.

93. 2692-21-6 ^{6.6}

Other branches may sprout as some members have urgent phone calls that take them in and out of the meeting.

94. 2692-33-6 ^{6.5}

When we grieve for what is lost, it clears the way towards a strengthening of love and commitment for what remains.

95. 2692-25-6 ^{6.3}

Throughout the five age groups, the percentage of those who are Very unwilling to pay increases as the age range goes up.

96. 2692-4142-5 ^{6.3}

The question then becomes: how can we cultivate and protect our human agency in an increasingly algorithmic world?

97. 2692-4345-20 6.3

After reading the man's message asking for his lyrics, Ridge hesitated.

98. 2692-38-5 6.2

But if they are dreading an event, crowding will make the person's experience of it even worse.

99. 2692-24-5 6.1

Another lesson might involve unpacking the design of popular apps: Why does an app use infinite scrolling instead of pages?

100. 2692-4345-15 6.1

The man texted, "I want to know how you're singing lyrics to my songs when I haven't even added lyrics to them yet."
